Dear Parents

Re – MOMO Challenge

I wanted to share some information with you to help continue to keep our children safe. I encourage you to monitor your children's screen time as there is a dangerous social media phenomenon called the "Momo Challenge." **Please use this as an opportunity to remind your children not to accept any invitation to play from an unknown number and not to click on unidentified links.**

The Momo Challenge can be found on WhatsApp (a free smartphone messaging application) and on Facebook. This is just one example of dangerous "games" on social media. This "challenge" involves a frightening avatar making contact with a child from an unknown number or name. The child is asked to perform various actions and tasks, and provide photos as proof. Some tasks have even led to suicide.

At this time there is one confirmed death of a 12 year old girl in Argentina, and three deaths currently under investigation in connection with the challenge. Students as young as 5 have allegedly acted on some directions from the challenge.

One of the first clues for parents to be concerned with is the image of a Japanese statue of a woman with bulging eyes and scary features. Children are given the series of tasks to finally meet the "Momo." I also encourage you to remind your children to change email and social media passwords frequently and block unknown numbers inviting them to play immediately.

Please notify the police via 101 of any attempted contacts to your children of this form of cyber-bullying spreading through social media and mobile phone. Some of the children are starting to talk about the challenge, there are no confirmed uses of this "Challenge" at Wilcombe, however, I feel it is important to share information to help build awareness and keep our children safe.

Please see the reverse of this letter for some top tips.

Yours sincerely

Reg Gilbert – Headteacher

Momo is a sinister 'challenge' that has been around for some time. It has recently resurfaced and once again has come to the attention of schools and children across the country. Dubbed the 'suicide killer game', Momo has been heavily linked with apps such as Facebook, WhatsApp, YouTube, and most recently (and most worryingly)... YouTube Kids. The scary doll-like figure reportedly sends graphic violent images, and asks users to partake in dangerous challenges like waking up at random hours and has even been associated with self-harm. It has been reported that the 'Momo' figure was originally created as a sculpture and featured in an art gallery in Tokyo and unrelated to the 'Momo' challenge we are hearing about in the media.

What parents need to know about

MOMO

CHILDREN'S VIDEOS BEING 'HIJACKED'

There have been recent reports that some seemingly innocent videos on YouTube and YouTube Kids (such as 'surprise eggs', unboxing videos and Minecraft videos) have been edited by unknown sources to include violence provoking and/or other inappropriate content. Even though YouTube monitor and remove videos that include inappropriate content, clips can be uploaded and viewed thousands of times before they get reported and removed. As a parent, it's difficult to spot these videos as the harmful content doesn't appear until partway through the video.

DISTRESSING FOR CHILDREN

Popular YouTubers and other accounts have been uploading reaction videos, showing their experience of the MOMO challenge. Some of the videos include a disclosure message warning that the content may be "inappropriate or offensive to some audiences" and that "viewer discretion is advised" but these videos are still easily accessed by clicking 'I understand and wish to proceed'. The image of the 'Momo' character can be deeply distressing to children and young people and it's important to note that it may slip through parental settings and filters.

SUGGESTED VIDEOS ON YOUTUBE

Video apps such as YouTube include an 'up next' feature which automatically starts playing another video based on the video just watched. Due to YouTube's algorithm, users are shown 'suggested videos' that they may be interested in. The thumbnails used on suggested videos are purposefully created in a way to encourage viewers to click them. During our research, we found that when watching one Momo related video, we were shown countless other Momo themed videos and other scary content which would be age-inappropriate for children under 18.

Top Tips for Parents

TELL THEM IT'S NOT REAL

Just like any urban legend or horror story, the concept can be quite frightening and distressing for young people. Whilst this may seem obvious, it's important for you to reiterate to your child that Momo is not a real person and cannot directly harm them! Also, tell your child to not go openly searching for this content online as it may only cause more distress.

BE PRESENT

It's important for you, as a parent or carer, to be present while your children are online. This will give you a greater understanding of what they are doing on their devices, as well as providing you with the opportunity to discuss, support and stop certain activities that your child may be involved in. As the nature of each task become progressively worse it's also important to recognise any changes in your child's behaviour.

TALK REGULARLY WITH YOUR CHILD

As well as monitoring your child's activity, it's important for you discuss it with them too. Not only will this give you an understanding of their online actions, but those honest and frequent conversations will encourage your child to feel confident to discuss issues and concerns they may have related to the online world.

DEVICE SETTINGS & PARENTAL CONTROLS

Ensure that you set up parental controls for your devices at home. This will help to restrict the types of content that your child can view, as well as help you to monitor their activity. In addition to this, it's vital that you are aware of your device and account settings to ensure your child's utmost safety. For example, on YouTube you can turn off 'suggested auto-play' on videos to stop your child from viewing content that they have not directly selected.

PEER PRESSURE

Trends and viral challenges can be tempting for children to take part in; no matter how dangerous or scary they seem. Make sure you talk to your child about how they shouldn't succumb to peer pressure and do anything they are not comfortable with, online or offline. If they are unsure, encourage them to talk to you or another trusted adult.

REAL OR HOAX?

As a parent it is natural to feel worried about certain things you see online that may be harmful to your child. However, not everything you see online is true. Check the validity of the source and be mindful of what you share as it may only cause more worry.

REPORT & BLOCK

You can't always rely on parental controls to block distressing or harmful material. People find ways around a platform's algorithm in order to share and promote this type of material. Due to this, we advise that you flag and report any material you deem to be inappropriate or harmful as soon as you come across it. You should also block the account/content to prevent your child from viewing it. Also encourage your child to record/screenshot any content they feel could be malicious to provide evidence in order to escalate the issue to the appropriate channels.

FURTHER SUPPORT

Speak to the safeguarding lead within your child's school should you have any concerns regarding your child's online activity or malicious content that could affect them.

If your child sees something distressing, it is important that they know where to go to seek help and who their trusted adults are. They could also contact Childline where a trained counsellor will listen to anything that's worrying them.

The Childline phone number is
0800 1111.
